Re: Integrated Global Services, Inc. – US Patent Number 10,188,983 - Systems and Methods
for Catalyst Screens in Selective Catalytic Reduction Reactors

Dear Mr. Mattes:

We represent Integrated Global Services, Inc. (IGS) in their intellectual property matters. We are pleased to announce that the United States Patent and Trademark Office has recently issued U.S. Patent Number 10,188,983 to IGS for its innovative technologies entitled, Systems and Methods for Catalyst Screens in Selective Catalytic Reduction Reactors.

It is our understanding that Cormetech had agreed to sell IGS' Secondary Screens embodying the technologies claimed in the '983 patent and that Cormetech has received delivery of one or more of the IGS' Secondary Screens for that purpose. However, rather than selling the IGS' Secondary Screens, it is also our understanding that Cormetech may have opted to sell an identical version of the secondary screens incorporating these technologies instead.

On behalf of IGS, we believe that an amicable business agreement can be reached with Cormetech to resolve these matters and we look forward to discussing the same with you. However, these discussions would be complicated if Cormetech were to proceed with delivery and/or installation the substituted secondary screens.

Best regards,

Brendan E. Squire
